EXPERIENCE

EDUNET | MERN FULL-STACK DEVELOPER INTERN REMOTE | DEC 2024 - JAN 2025

Developed a simple and functional website resembling Spotify, allowing users to stream songs seamlessly. Integrated an admin panel enabling secure song uploads.

SKILLS

Programming Languages: Java, HTML, CSS, JavaScript, Python
Libraries/Frameworks: React, Nodejs, Express Js
Tools / Platforms: Git, Vs code, Postman, Excel, Power point
Databases: MongoDB, MYSQL, PostgreSQL

PROJECTS / OPEN-SOURCE

Music Player(Spotify clone) | [Link](#)

MongoDB, Express Js, React Js, Node Js

Built a fully functional music streaming application inspired by Spotify. The platform provides users with the ability to stream songs effortlessly, offering a seamless and intuitive experience. Integrated an admin panel to enable secure song uploads and manage content efficiently.

Key Features

- Stream songs seamlessly with intuitive playback controls.
- Secure song uploads through a fully functional admin panel.
- Browse and organize music by genre, artist, or album.
- User-friendly interface ensuring smooth navigation.
- Responsive design for an optimal experience across devices.
- Scalable architecture for handling a growing song database.

Food Delivery App(Zomato clone) | [Link](#)

MongoDB, Express Js, React Js, Node Js

Designed and developed a responsive full-stack web application for food delivery services, inspired by Zomato. The platform enables users to explore restaurants, browse menus, and place orders effortlessly.

Key Features:

- User authentication system (register, login, logout).
- Search functionality for restaurants and menu items.
- Add-to-cart and checkout process.
- Order history tracking.
- Fully responsive design for seamless user experience across devices.

CERTIFICATIONS

- The Complete Full-Stack Web Development Bootcamp - **Udemy**
- CRUD Operations in MongoDB - **MongoDB**
- Postman API Fundamentals Student Expert - **Postman**
- Completed 40+ online certifications from Udemy, NPTEL, Coursera, Infosys Springboard and more
